

I wish to register my very STRONG OPPOSITION opposition to the instant proposed regulation. I believe that, if the proposal is allowed to proceed, it will interfere with legitimate, established emergency communications systems and make it more difficult for those who risk their lives in order to protect the lives of everyone living in the United States. We owe it to them, and to the people they are attempting to protect, NOT to make their jobs any more difficult or dangerous. As regards the purported "benefits" of BPL, I believe there are other, no more expensive and, in the overall, no less burdensome means to connect to the Internet. Further, to the extent that the few remote areas of the country are not being well served, these WILL be served, in the very near term, through other, reasonably-priced means, already on the horizon.
